UI/Front-End Developer Machine Test

Task Time : 4 hours

Introduction

As discussed, please find the Dropbox URL with the Figma design and the font files. Before starting the test, you should create a Figma account if you don't have one.

The Figma file provided in the dropbox has the option to edit. A view only link for the same design is also provided so as to compare the final output.

Please go through the files and let us know if you have any queries. Once you're done with the coding, you can revert with a URL after uploading it in a public repository on GitHub.

G-Drive Link (includes figma & font files) :
https://drive.google.com/file/d/1ZsxGlCoeG5_evhTsHIcdwhPZm8SxyEom/view?usp=sharing

Note: Don't use the fonts provided for any other purposes other than the test.

Design Link (View only) :
https://www.figma.com/file/pxnWkwWoJkdtThzWNxiOJF/WRG_test_skin-care-product

Instructions

1. Convert the shared Figma design to HTML. You are allowed to use any framework or plugins you wish. Please do make sure to list out the plugins or frameworks used.
2. Give your best shot and complete the maximum you can within **4 Hours**.
3. The final HTML should perfectly match the Desktop design (pixel perfection is the key) and also should be completely responsive (at least till iPhone5 320px).
4. Animation references for each section are mentioned in the comments.

What are we looking for

- Pixel perfection in the development.
- Code structure and organization
- Understanding of HTML, javascript, and CSS
- Simplicity and ease of understanding the code
- Accessibility and Best practices
- Good page speed.
- SEO best practices.
- Page transitions and animations (good to have only)
